1. This Office is in response to the amendment received 04/03/03. Claims 1-20, 25, 29, 32 and 62-97 are pending. Claims 21-24, 26-28, 30, 31 and 33-61 have been canceled.
2. The examiner acknowledges receipt of the IDS filed 11/20/00. An initialed copy of the 1449 form is attached.
3. The proposed drawing correction received 09/01/00 is approved. New corrected drawings are required. The corrected drawings are required in reply to this Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.
4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the reentrant fold and the termite barrier flange covering the foundation must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

5. The substitute specification filed with amendment B received 09/01/00 has been entered.

6. The disclosure is objected to because of the following informalities: all Certificate of Correction changes must be entered in a reissue application **without bracketing or underlining** so as to incorporate the changes as part of the original patent and not as changes in the reissue. The specification filed 09/01/00 fails to include the changes **without bracketing or underlining** made by the Certificate of Correction filed 05/19/97.

Appropriate correction is required.

7. A substitute specification excluding claims is required including the changes made by Certificate of Correction. Applicant is reminded that the specification must be presented in single column form as a "cut-out" of the original patent incorporating the changes made by Certificate of Correction **without any underlining or bracketing**. Any changes made by any amendment subsequent to the Certificate of Correction must be shown in accordance with 37 CFR 1.173(d).

8. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

9. Claim 91 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There is an inadequate written description of a termite barrier flange covering the foundation.

10. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

11. Claims 25, 29, 32 and 92-97 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 25 line 7 "the mesh sheet" lacks antecedent basis as only a sheet has been set forth at line 4. The examiner suggests inserting "mesh" before the first occurrence of "sheet" at line 4.

In claim 92 at line 4 "the having" is unclear. There appears to be missing language after "the".

12. Claims 62, 64-86 and 91-97 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the

Art Unit: 3635

reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

These claims omit the limitation that the sheet or strip is a mesh. Applicant argued in at least amendment B filed 06/29/92 of applicant S.N. 07/825299 that none of the prior art taught a mesh sheet in the claimed positions relative to a building. The limitation "mesh" also appears in the examiner's reason for allowance in paper 11 of application S.N. 08/040305.

13. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following: it fails to cover all amendments.

14. Claims 1-20, 25, 29, 32 and 62-97 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

15. In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

16. The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

17. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
